Panda Antivirus

MEGA
DETECTION

2008

The new **Panda Antivirus 2008** is the easiest-to-use protection for your computer. You hardly have to lift a finger, so you can chat, share photos and videos with friends, read your favorite blogs, or simply surf the Web, with complete peace of mind. And it's so light, you won't even notice it.

Panda Antivirus 2008 includes:

> Antivirus

Detects and eliminates all types of viruses, worms and Trojans

You can use the Internet and download or share files in the knowledge that you are fully protected against all types of viruses, worms, and Trojans. Forget about infections!

> Antispyware / Antiadware

Stops anyone spying on you on the Internet

Detects and eliminates spyware and other programs that install themselves on your computer without your permission. Safeguard your privacy!

> Antiphishing

Lets you bank or shop online securely

It can identify fraudulent emails, preventing you from giving away your passwords, account numbers, or confidential data, so you will be safe from these dangerous scams. Bank and shop online with complete peace of mind!

> Antirootkit

Detects and eliminates hidden threats

Your reinforced protection detects threats that try to hide on your PC. Protect yourself from hidden threats!

> Malicious web page filter

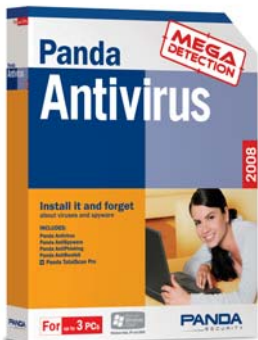

Prevents access to potentially unsafe websites

It recognizes dangerous web pages and prevents you from opening them and becoming infected. This feature is particularly effective against certain types of spyware and online fraud. Surf the Internet safely!

> In-depth online scanning

Deep scanning of your PC with TotalScan Pro

You can scan your PC in-depth whenever you want and remove all threats that might have slipped past traditional protection. Scan your PC in-depth!

**Install it and forget
about viruses and spyware**

MEGA
DETECTION

Antivirus + Firewall

2008

Now you can be sure that all the information on your PC is completely safe, thanks to the reinforced protection of the new **Panda Antivirus + Firewall 2008**. Check the latest news, stay in touch with your contacts, download the programs you need, or bank online with total comfort.

Panda Antivirus + Firewall 2008 includes:

- > Antivirus
- > Antispyware / Antiadware
- > Antiphishing
- > Antirootkit
- > Malicious web page filter
- > In-depth online scanning

+ Personal firewall

Prevents hacker attacks, even in WiFi networks

When you connect to the Internet, many programs try to access your PC. Some of them are not dangerous, such as those that let you update applications you have installed, but others will try to exploit your connection or control your computer.

Panda Antivirus + Firewall 2008 includes a configurable personal firewall to stop intruders and hackers from accessing your PC.

Turn your computer into a fortress!

+ TruPrevent Technologies

Proactive protection through behavioral analysis

Some new threats are able to spread globally in just a few hours. In this time, your PC could be unprotected, as your antivirus will not have had time to update.

The TruPrevent Technologies included in **Panda Antivirus + Firewall 2008** detect and block these unknown threats, intelligently scanning program behavior. This means your PC will have the reinforced protection it needs.

Stay one step ahead of unknown threats!

Maximum protection against viruses, spyware, and hackers

Panda

Internet Security

MEGA
DETECTION

2008

Enjoy truly global security with the new **Panda Internet Security 2008**. All your computer activity will be fully protected against identity theft, and you'll be able to forget about other Internet threats. It also allows you to make automated backup copies and optimize the performance of your computer.

Panda Internet Security 2008 includes:

- > Antivirus
- > Antispyware / Antiadware
- > Antiphishing
- > Antirootkit
- > Malicious web page filter
- > In-depth online scanning
- > Personal firewall
- > TruPrevent Technologies

+ Backup and restore

Automatic security copies of your important files and documents

You can simply and automatically backup your files to easily recover important documents. Back up your files quickly and easily!

+ PC Tuneup

Helps optimize system performance

Firstly, it cleans all unnecessary items, and then it defrags the disk to ensure optimum performance. Keep your computer in top shape!

+ Identity Protect

Keeps your personal data safe from online identity theft

You will know exactly how and when your sensitive data (account numbers, credit card details, etc.) is going to be sent out, so you will always have control of it. Don't let anyone access your data without your permission!

+ Antispam

Automatically blocks junk mail

Automatically filters junk mail, keeping your inbox spam-free. Rid yourself of the avalanche of junk mail!

+ Parental control

Ensures your kids only see appropriate content

Its content control feature can let you decide what type of web pages each user of a computer can view, with a range of custom filters (child, adolescent, employee...). You decide how the Internet should be used!

Global protection for complete peace of mind on the Internet

MEGADETECTION: PANDA'S SECURITY MODEL

The security model offered by Panda Security is based on four pillars that guarantee detection of more than a million viruses and other threats, offering levels of protection far higher than other security solutions.
