

| GateDefender Integra Models comparative             | GateDefender Integra 100  | GateDefender Integra 300  |
|---|---|---|
|   |  |  |
| <b>Características generales</b>                    |   |   |
| Transparent bridge mode                             | √   | √   |
| Remote acces web console                            | √   | √   |
| Lists Import / Export                               | √   | √   |
| System load view                                    | √   | √   |
| Protection activity monitoring                      | √   | √   |
| Customizable alerts and reports                     | √   | √   |
| Graphic activity reports                            | √   | √   |
| Signature files and databases update                | Every 15 minutes  | Every 15 minutes  |
| Number of nodes (max. recommended)                  | 100   | 250   |
| Centralized Monitoring                              | SNMP - Syslog - SMTP  | SNMP - Syslog - SMTP  |
| Time synchronization                                | NTP   | NTP   |
| <b>Firewall</b>                                     |   |   |
| Firewall Throughput                                 | 330 Mbps  | 850 Mbps  |
| Concurrent connections                              | 350,000   | 550,000   |
| NAT based policies                                  | √   | √   |
| <b>VPN</b>  |   |   |
| Dedicated tunnels                                   | unlimited   | unlimited   |
| Encryption methods                                  | 3DES, AES, Blowfish, Twofish, Serpent   | 3DES, AES, Blowfish, Twofish, Serpent   |
| Support   | Hub and spoke   | Hub and spoke   |
| VPN types (Protocols)                               | PPTP, L2TP, IPSec, SSL  | PPTP, L2TP, IPSec, SSL  |
| <b>IPS/IDS</b>                                      |   |   |
| Detected attacks by IPS                             | 5000  | 5000  |
| Real time automatic update                          | √   | √   |
| <b>Anti-malware</b>                                 |   |   |
| Scanned protocols                                   | HTTP, FTP, SMTP, POP3, IMAP4 y NNTP   | HTTP, FTP, SMTP, POP3, IMAP4 y NNTP   |
