

# Case Study. EADS CASA Espacio. Spain.

## Details

- Company size: Key account.
- Sector: Aerospace.
- Country: Spain.
- Number of licenses: 500.

*“With Panda Security for Business we have managed to detect and remove new threats, such as spyware, from our computers, which have come from both within and outside the local area network”.*

**Pedro Rebollo**  
Antivirus Security Manager  
EADS CASA Espacio

## Benefits

- **Protection for critical and sensitive information**  
Protects critical and sensitive information from data leaks, targeted attacks and unknown malware thanks to its advanced behavioral analysis and proactive protection.
- **Regulatory compliance**  
Helps implement enterprise regulation compliance by managing security policies with rule-based application control and network access control.
- **Reduces complexity**  
The easy-to-use centralized management console controls all endpoints from a single location.
- **Maximizes return on investment**  
Provides a converged, single-priced solution complemented with host-based intrusion prevention, access and application control and targeted-attack audits.
- **Increases employee productivity**  
Drastically reduces spam and helps control the use of unproductive or restricted applications and deletes undesired content.
- **Helps improve risk management**  
Offers the necessary tools to manage threats in real-time thanks to the dashboard and to a complementary in-depth audit service capable of uncovering hidden malware not detected by traditional means.
- **Telephone Technical Support 24 hours a day, 365 days a year**  
Our experts are available whenever you need to solve any problems.

## EADS CASA Espacio

Panda Security for Business with Exchange: the most straightforward comprehensive protection for corporate networks.

EADS CASA Espacio has been a Panda Security client since 1998. Back then, this organization already required a versatile and dynamic system capable of protecting computers with needs ranging from manufacturing to design, without impeding the freedom to use the Internet as a valuable source of information and an essential means of communication.

Those needs have evolved and so have the solutions offered by Panda Security. Panda Security for Business with Exchange can now protect both the administration group computers that remotely access Citrix servers, and laptops that need the protection of Platinum's personal firewall or workstations with Outlook mail clients that need a simple, straightforward solution to remove spam.

Within the layered protection strategy, EADS CASA Espacio protects laptops, workstations, file servers and the Exchange mail server with Panda Security for Business with Exchange. It also has a corporate firewall and a perimeter anti-spam appliance.

By creating four repositories with direct Internet access, the protection and signature file are updated daily across the 400 laptops protected by the Desktops module, the Exchange mail server protected with the Exchange Servers module, as well as the Windows 2000 file servers distributed throughout the corporate LAN.

## Case Study. EADS CASA Espacio. Spain.

### About Eads Casa Espacio

EADS CASA Espacio is a Composite Material Testing Center belonging to EADS SPACE. Since 1996, it designs, produces, integrates and tests large space subsystems for launchers, satellites and the International Space Station. It has experience in: carbon fiber structures, radio frequency for aerials, thermal controls and wiring.

### Solution

#### Panda Security for Business with Exchange

- **AdminSecure Administration console.** It is based on modular, flexible and scalable architecture. It allows deployment, installation and configuration of the protection modules in multiple versions and network layers.
- **Complete integrated protection** against all types of threats for workstations and file servers. TruPrevent technologies protect **workstations** and **file servers** against all types of malware (viruses, spam, phishing, spyware, rootkits, etc.) in a reactive, proactive and preventive way (HIPS).
- Antivirus and anti-spam **protection** plus content filtering for **Exchange** mail servers.
- **Application monitoring.** Helps control the use of unproductive or restricted applications and deletes undesired content.
- **Control over network access.** With NetworkSecure technology, it protects the network from computers that do not have an antivirus installed or computers with weak protection..
- **In-depth malware audit** service. Malware Radar detects and disinfects threats thanks to **Collective Intelligence** technologies.

Different security policies and settings defined in Panda Security for Business with Exchange, as well as the viral incidents detected and automatically disinfected by the SmartClean2 technology are recorded in a free MSDE (Microsoft SQL Desktop Engine) database, which creates a significant saving on licenses, as there are no extra costs once purchased.

According to Pedro Rebollo, *“the installation and removal of workstation protection is a simple, intuitive process performed from the console and which does not require login scripts or on-site intervention”*. Implementation was a rapid process, taking only four hours to make the system fully operative.

This, along with the possibility of adding additional management consoles at no extra cost, makes AdminSecure a truly distributed administration tool, without anyone at EADS CASA Espacio having to go to the Data Processing Center to carry out any operations or generate Panda Security for Business with Exchange virus activity reports.
