

## Case Study. American Risk Solutions. USA.

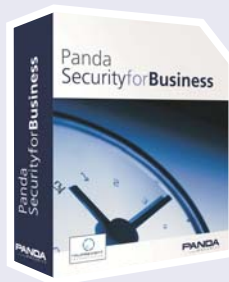

### Details

- Company size: Medium-sized company.
- Market: Financial services.
- Country: USA.
- Number of licenses: less than 50.

### Benefits

- **Protection for critical and sensitive information**  
Protects critical and sensitive information from data leaks, targeted attacks and unknown malware thanks to its advanced behavioral analysis and proactive protection.
- **Regulatory compliance**  
Helps implement enterprise regulation compliance by managing security policies with rule-based application control and network access control.
- **Reduces complexity**  
The easy-to-use centralized management console controls all endpoints from a single location.
- **Maximizes return on investment**  
Provides a converged, single-priced solution complemented with host-based intrusion prevention, access and application control and targeted-attack audits.
- **Increases employee productivity**  
Drastically reduces spam and helps control the use of unproductive or restricted applications and deletes undesired content.
- **Helps improve risk management**  
Offers the necessary tools to manage threats in real-time thanks to the dashboard and to a complementary in-depth audit service capable of uncovering hidden malware not detected by traditional means.
- **Telephone Technical Support 24 hours a day, 365 days a year**  
Our experts are available whenever you need to solve any problems.

*"Performance, security and antivirus protection in one suite, all for a great value, differentiate Panda's corporate products from other security suites".*

**Richard Kunz**  
General Manager  
American Risk Solutions

## Panda Security protects American Risk Solutions, with Panda Security for Business

With headquarters in California, USA, American Risk Solutions is a commercial collection agency that offers receivable collection programs to specialized markets, including insurance, transportation, premium finance, automobile loans, technology and construction. To achieve effective management and maintain quality of service, thereby increasing client loyalty, American Risk Solutions needs the latest in information management and IT security technology.

Panda Security for Business and its tool Panda AdminSecure helps American Risk Solutions to easily and centrally protect and disinfect its network. This allows it to focus on providing the best service while providing secure communications with clients, many of whom are well-known companies throughout the nation.

*"I can say that Panda has done an excellent job in keeping my network, mobile and home user PCs protected against the threats of the Internet in almost every shape or form,"* says Richard Kunz, General Manager of American Risk Solutions. *"I feel safe as long as I've got the Panda icon down in the systray watching the system".* Now, American Risk Solutions uses the features and services of Panda Security to protect its workstations, laptops and file servers. Using advanced technologies, Panda Security automatically determines if systems are being breached, attacked or controlled by malicious software, even without prior knowledge of the threat in particular.

## About American Risk Solutions

With 16 years of industry experience representing some of the biggest and best-known companies in the USA, it offers receivable collection programs to specialized markets, including insurance, transportation, premium finance, automobile loans, technology and construction

## Solution

### Panda Security for Business

- AdminSecure is the **console for managing** Panda Security's 2008 Corporate Solutions. It is based on **modular, flexible and scalable** architecture. It allows deployment, installation and configuration of the protection modules in multiple versions and network layers.
- **Complete integrated protection** against all types of threats for workstations and file servers. TruPrevent technologies protect **workstations** and **file servers** against all types of malware (viruses, spam, phishing, spyware, rootkits, etc.) in a reactive, proactive and preventive way (HIPS).
- **Application monitoring.** Helps control the use of unproductive or restricted applications and deletes undesired content.
- **Control over network access.** With NetworkSecure technology, it protects the network from computers that do not have an antivirus installed or computers with weak protection..
- **In-depth malware audit** service. Malware Radar detects and disinfects threats thanks to **Collective Intelligence** technologies.

“Install it and forget it. It's just that simple”

After trying personal and corporate products from Symantec and McAfee, American Risk Solutions chose Panda Security after searching for better security and more features. Kunz says that *“performance, security and antivirus protection in one suite, all for a great value, differentiate Panda's corporate products from other security suites”*.

American Risk Solutions needs to optimize its resources. Therefore, Panda's Tech Support team collaborates with American Risk Solutions to ensure its computers' security and provide the expertise and assistance it needs. *“The corporate user support has always been able to solve any issue”*.

*“My experiences have been consistent with Panda, both on the sales and support sides. Overall, I believe that Panda is easier to deal with than the larger and sometimes better-known companies. You can still reach a real person for tech support, which is a huge benefit for any end-user or IT professional”* explains Kunz.
