

# Case Study. Spartan Truck Hire. South Africa.

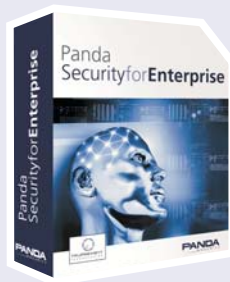

## Details

- Company size: SMB
- Country: South Africa
- Market: Transport
- Number of licenses: 50

## Benefits

- **Protection for critical and sensitive information**  
Protects critical and sensitive information from data leaks, targeted attacks and unknown malware thanks to its advanced behavioral analysis and proactive protection.
- **Regulatory compliance**  
Helps implement enterprise regulation compliance by managing security policies with rule-based application control and network access control.
- **Reduces complexity**  
The easy-to-use centralized management console controls all endpoints from a single location.
- **Maximizes return on investment**  
Provides a converged, single-priced solution complemented with host-based intrusion prevention, access and application control and targeted-attack audits.
- **Increases employee productivity**  
Drastically reduces spam and helps control the use of unproductive or restricted applications and deletes undesired content.
- **Helps improve risk management**  
Offers the necessary tools to manage threats in real-time thanks to the dashboard and to a complementary in-depth audit service capable of uncovering hidden malware not detected by traditional means.

*"Excellent products, I recommend them to other companies and clients".*

**Lee Lloyd**  
IT manager  
Spartan Truck Hire

## All the computers at Spartan Truck Hire, protected by Panda Security

From humble beginnings to being one of the major players in the truck hire market. This has been the story of Spartan Truck Hire over the last 21 years. While many companies disappeared as quickly as they appeared, Spartan Truck Hire is not just still around, it has grown strongly and provides an invaluable service to its many clients.

To guarantee quality of service, its IT systems must operate perfectly, without interruptions caused by malware. To this end, it sought advice from FFG Connection CC, its Internet service provider, who recommended Panda Security solutions.

"Until we installed Panda Security", explains Lee Lloyd, the IT manager at Spartan Truck Hire, "the network was slow and we had problems with viruses". The other security product we used was simply not up to the job.

Spartan Truck Hire has 40 computers and two servers, with an ADSL connection. The installation of Panda Security solutions was fast and straightforward. The company chose Panda GateDefender to protect its Internet connection, which "was installed and running in just one hour", while to replace the other anti-malware solution on computers they chose Panda Security for Enterprise. Once the protection was installed on the computers, "the rest of the installation took just a few minutes", says Lloyd.

## About Spartan Truck Hire

From humble beginnings to being one of the major players in the truck hire market. This has been the story of Spartan Truck Hire over the last 21 years. While many companies disappeared as quickly as they appeared, Spartan Truck Hire is not just still around, it has grown strongly and provides an invaluable service to its many clients.

To guarantee quality of service, its IT systems must operate perfectly, without interruptions caused by malware. To this end, it sought advice from FFG Connection CC, its Internet service provider, who recommended Panda Security solutions.

## Solution

### Panda Security for EnterPrise

- **AdminSecure Administration console.** It is based on modular, flexible and scalable architecture. It allows deployment, installation and configuration of the protection modules in multiple versions and network layers.
- **Complete integrated protection** against all types of threats for workstations and file servers. TruPrevent technologies protect **workstations** and **file servers** against all types of malware (viruses, spam, phishing, spyware, rootkits, etc.) in a reactive, proactive and preventive way (HIPS).
- Antivirus and anti-spam **protection** plus content filtering for **Exchange** mail servers.
- **Application monitoring.** Helps control the use of unproductive or restricted applications and deletes undesired content.
- **Control over network access.** With NetworkSecure technology, it protects the network from computers that do not have an antivirus installed or computers with weak protection.
- **Protects MTA servers against malware and spam,** optimizing email service resources. It also includes anti-malware protection and content filter for Microsoft ISA servers, efficient at all levels.
- **In-depth malware audit** service. Malware Radar detects and disinfects threats thanks to **Collective Intelligence** technologies.

*“We’ve had great improvement with respect to spam and virus infections”*

Since Panda Security has been protecting Spartan Truck Hire, Lee Lloyd has noticed the advantages. He points out that there have been “many improvements with respect to spam and infection by viruses”, but not just this, external connection has improved and the monthly Internet bill has dropped as a result of improved bandwidth consumption.

As an added advantage, the Panda Security for Enterprise administration console eases the task of managing protection across networked computers. Lloyd says it’s “really easy, I just don’t have to worry about it”.

In short, Panda Security has offered a product that will truly protect the network of Spartan Truck Hire, as its IT manager can testify: “excellent products, I recommend them to other companies and clients”.
