

Case Study. Lantegi Batuak. Spain.

Details

- Company size: Mid-sized company.
- Country: Spain.
- Sector: Highly distributed industry and services.
- Licenses: 350
- Number of offices protected and managed centrally: 19
- Mobile computers and computers outside the network protected: Yes

Benefits

- **Reduced costs**
Thanks to Panda Managed Office Protection, the resources dedicated to managing the security solution are reduced to a minimum.
- **Simple to manage**
Its straight-forward Web administration console lets you install and manage IT protection easily from any computer with an Internet connection.
- **Ideal for distributed environments**
The administrator (or MSSP) can remotely monitor and configure the anti-malware protection and personal firewall, regardless of their location or the quality of the Internet connection.
- **Extremely light**
Thanks to its online architecture (hosted) it goes unnoticed by users.

Panda Managed Office Protection

“What I would highlight most about PMOP is that it is transparent to end-users. This means it works well and operates without interfering”.

Fernando Garro
Responsable de Sistemas Informáticos
Lantegi Batuak

Lantegi Batuak chooses Panda Managed Office Protection to defend against malware.

Lantegi Batuak tenía 350 ordenadores que proteger. Se trataba de una red altamente dispersa ya que los puestos se distribuían entre más de 19 delegaciones e incluían, además, puestos situados fuera de la red de la empresa que también tenían que ser protegidos.

“The solution: Panda Managed Office Protection The main feature of our IT resources is that they are widely distributed: 19 offices with servers, approximately 350 workstations, and several computers outside the VPN. Up until last year, keeping the antivirus consoles in each office up-to-date, monitoring them and updating the protection on the computers in the perimeter consumed for too many resources”, Fernando Garro, IT Systems Manager of Lantegi Batuak.

The solution: Panda Managed Office Protection

In this case, Panda Security advised Lantegi Batuak to install Panda Managed Office Protection (PMOP), Panda Security's SaaS (Security as a Service) solution.

One of the advantages of a SaaS solution such as PMOP, as opposed to traditional protection, is that it requires no prior investment.

Case Study. Lantegi Batuak. Spain.

About Lantegi Batuak

The Lantegi Batuak Foundation is a non-profit organization that generates quality job opportunities for people with disabilities -with special emphasis on those with intellectual disabilities- from the province of Biscay (Spain).

These opportunities are generated by creating and managing industrial and service activities, enabling vocational and social integration for those involved. The opportunities created cover all stages from guidance and training, occupational centers, special employment centers and ordinary employment.

Solution

Panda Managed Office Protection is an online security service that eliminates the costs derived from security.

It provides an always-on, easy-to-use Web console that allows remote installation and management of the protection from any place at any time.

It offers SaaS via the Web, through a management portal that enables SMBs to delegate their security management to a service provider.

Panda Managed Office Protection is complemented with in-depth malware audits benefiting from Panda Security's unique Collective Intelligence Technologies.

Traditional protection for workstations requires hardware and software investment for the corporate network (administration servers, repositories, databases). It also has vulnerable points that can cause flaws and recurring maintenance and update costs. An SaaS anti-malware solution on the other hand, hosts all the management infrastructure on the premises of the company that provides the service.

The more distributed the environment, the greater the saving (on-site protection models normally require one server for each location). On average, implementation of an SaaS solution in a medium-sized company could save up to 50% of the total cost.

As the Lantegi Batuak network is highly distributed, Panda Security's sales team recommended Panda Managed Office Protection as the best security solution for the company.

"What I would highlight most about PMOP is that it is transparent to end-users. This means it works well and operates without interfering," says Fernando Garro. "PMOP's Web administration console has greatly simplified management of our anti-malware system. Tedious and complex software updates in each office are a thing of the past".
