

New 2007 Products: a solution to suit all needs

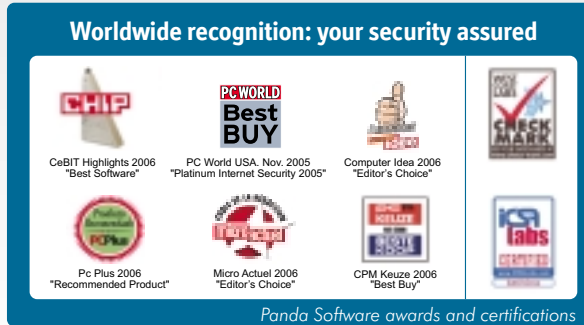

Anne enjoys the Internet, browsing, chatting and swapping photos and music. She knows that she must protect herself, but wants something **very simple**, easy to use and that works almost on its own.

David uses the Internet very often and is particularly concerned about protecting the important information and documents on his computer. To **reinforce his security**, he needs much more than an antivirus.

Peter gets the most out of the Internet, and shops and banks online. For this reason, he needs **maximum protection** to secure his personal logon details.

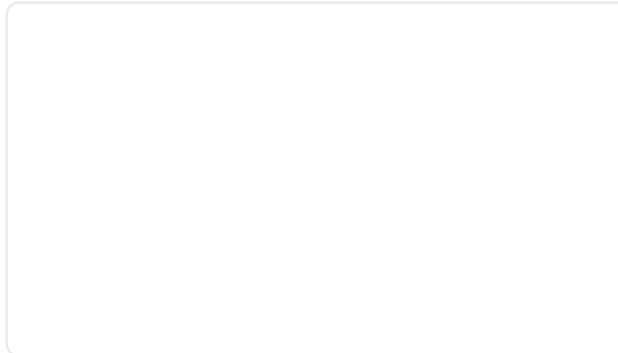

And you? What do you use the Internet for? **Panda Software's new 2007 products** offers the solution you need to protect yourself.

New 2007 Products

NEW

Panda Antivirus 2007

The new **Panda Antivirus 2007** is an ultra-light product, designed especially to make protecting your computer as easy as possible.

Automatically detects and eliminates all types of viruses

Viruses, worms, and Trojans have evolved and multiplied. Now they are designed to act without you noticing. Panda Antivirus 2007 automatically detects and eliminates them to keep your PC virus-free.

With Panda Antivirus 2007, you can surf the Internet, send and receive email, play games, download files, chat and anything else you want with no need to worry about viruses. **Forget about infections!**

Keeps your PC free from spyware

The Internet is teeming with spy programs that can invade your privacy and steal information by secretly snooping on your online activity.

As well as invading your privacy, spyware can also slow down your PC, show annoying and aggressive pop-up ads, change your computer settings, etc.

Panda Antivirus 2007 detects and completely removes spyware and other annoying programs automatically.

Safeguard your privacy!

Protects against online fraud.

New sophisticated online fraud techniques emerge every day, such as phishing (fraudulent emails with links to spoof bank websites). These scams are designed to obtain your login details, account numbers and other data that can then be used to steal your money.

Panda Antivirus 2007 will keep you safe from these dangerous scams. **Bank and shop online with complete peace of mind!**

BUY IT NOW and forget about viruses and spyware!

NEW Titanium

Panda Antivirus + Firewall 2007

The new **Panda Antivirus + Firewall 2007** is a whole lot more than an antivirus, as it protects your information from all types of Internet threats, reinforcing your security and safeguarding your computer from attack.

Latest generation antivirus

Automatically detects and eliminates all types of viruses

No doubt you keep photos, documents, games and other files on your PC. Panda Antivirus+Firewall 2007 will protect them automatically from all types of viruses, worms and Trojans.

Award-winning AntiSpyware

Keeps your Internet activity private

Is your PC slower than usual? Do pop-up ads appear for no apparent reason? With Panda Antivirus+Firewall 2007 you won't suffer the effects of spyware and you'll be able to use the Internet without anyone snooping on you.

Personal firewall

Blocks hackers and intruders

Enjoy the Internet without the worry of hackers and intruders infiltrating your computer. Panda Antivirus+Firewall 2007 blocks them before they can enter, turning your computer into a fortress.

Protection against online fraud

Bank and shop online with complete peace of mind

Shop and bank online without having to worry about phishing –fraudulent emails that link to spoofed bank web pages- or other Internet fraud.

NEW Platinum

Panda Internet Security 2007

The new **Panda Internet Security 2007** offers maximum protection so you can get the most out of the Internet. You can shop and bank online with absolute peace of mind.

Panda Identity Protect

Secures your personal data

Personal data theft (login details, account and credit card numbers...) is becoming a major threat to your security. With Panda Internet Security 2007, no one can access your data without your permission.

Latest generation antivirus and AntiSpyware

Automatically detects and eliminates all types of viruses and spyware

Viruses, worms, and Trojans have evolved and multiplied. Now they are designed to act without you noticing. Panda Internet Security 2007 automatically detects and eliminates them to keep your PC virus-free.

Personal firewall

Blocks hackers and intruders

Hackers are constantly finding new ways to attack computers. Panda Internet Security 2007 blocks them before they can enter, turning your PC into a fortress.

Protection against online fraud.

Bank and shop online with complete peace of mind

New sophisticated fraud techniques are designed to trick you into revealing personal information, such as bank details, to steal your money. Panda Internet Security 2007 lets you bank and shop online without the worries.

AntiSpam

Automatic blocking of junk mail

Keep your inbox clean and organized, without wasting time reading and deleting junk mail.

Parental control

Restricts access to inappropriate websites

Let your kids use the Internet without the worry of exposing them to inappropriate websites (violence, racism, pornography...).
