

Case Study. KINEPOLIS. Europe.

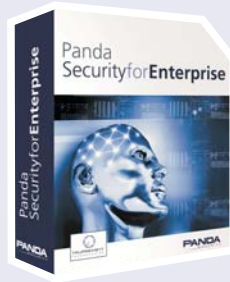

Details

- Tamaño del cliente: Gran cuenta.
- Sector: Ocio.
- País: Bélgica, España, Francia, Polonia y Suiza.
- Número de licencias: 550

Benefits

- **Protection for critical and sensitive information**
Protects critical and sensitive information from data leaks, targeted attacks and unknown malware thanks to its advanced behavioral analysis and proactive protection.
- **Regulatory compliance**
Helps implement enterprise regulation compliance by managing security policies with rule-based application control and network access control.
- **Reduces complexity**
The easy-to-use centralized management console controls all endpoints from a single location.
- **Maximizes return on investment**
Provides a converged, single-priced solution complemented with host-based intrusion prevention, access and application control and targeted-attack audits.
- **Increases employee productivity**
Drastically reduces spam and helps control the use of unproductive or restricted applications and deletes undesired content.
- **Helps improve risk management**
Offers the necessary tools to manage threats in real-time thanks to the dashboard and to a complementary in-depth audit service capable of uncovering hidden malware not detected by traditional means.
- **Telephone Technical Support 24 hours a day, 365 days a year**
Our experts are available whenever you need to solve any problems.

"The installation and distribution on several servers was done in less than 2 days. I didn't have to be on-site. Implementation was very easy and quick. I am very satisfied with the console reports".

Nico Messelis
Support Engineer
Kinopolis

The Kinopolis Group chooses Panda Security to protect its network and manage security

Kinopolis is present in several European countries and provides leisure in its 22 sites to over 23 million spectators a year, which makes it one of the leading groups in the European market. It has over 1,950 employees.

The group wants to offer its users the best cinematographic experience, providing maximum quality and benefits to its clients through innovation and a close relationship. To do so, security is vital for the Kinopolis Group.

Panda Security for Business with Exchange through its AdminSecure centralized management tool and Panda GateDefender, keep the Kinopolis Group threat-free simply and centrally. As a result, all its applications are operative and provide optimum service to its clients.

They have to secure 450 workstations in 23 different European sites. *"Our IT department has 4 employees to support all the countries we are present in. In the past, we had to fly from one place to another to solve problems. This is why we started to search for a reliable, efficient and simple solution"* says Messelis. *"We believe viruses are a very serious problem. When the previous solution detected a virus, we had to remove it manually. Panda Security for Business with Exchange and GateDefender free us from many of these manual jobs".*

About Banco Sofitasa

Banco Sofitasa es una institución financiera regional con presencia en todo Venezuela, orientada al desarrollo del país y comprometida con la satisfacción de las necesidades de los clientes a través de la innovación de productos y servicios a la medida de sus requerimientos, con un valor agregado superior al de los competidores sustentado en la tecnología de vanguardia, la alta capacidad y vocación del recurso humano y la responsabilidad de proporcionar bienestar a los ciudadanos venezolanos.

Solution

Panda Security for Business with Exchange

- **AdminSecure Administration console.** It is based on modular, flexible and scalable architecture. It allows deployment, installation and configuration of the protection modules in multiple versions and network layers.
- **Complete integrated protection** against all types of threats for workstations and file servers. TruPrevent technologies protect **workstations** and **file servers** against all types of malware (viruses, spam, phishing, spyware, rootkits, etc.) in a reactive, proactive and preventive way (HIPS).
- Antivirus and anti-spam **protection** plus content filtering for **Exchange** mail servers.
- **Application monitoring.** Helps control the use of unproductive or restricted applications and deletes undesired content.
- **Control over network access.** With NetworkSecure technology, it protects the network from computers that do not have an antivirus installed or computers with weak protection..
- **In-depth malware audit** service. Malware Radar detects and disinfects threats thanks to **Collective Intelligence** technologies.

“Above all, the solution must provide high scalability. At present, we have a solution installed on all computers that are maintenance and administration-free. In the future, we will apply the solution to the 400 PCs in sales outlets”

“While we were implementing Panda Security for Business with Exchange, it immediately detected 500 viruses that had not been detected by the previous solution. I can confirm that Panda’s performance is better than that of the previous solutions” explains Messelis. “Additionally, it saved us a lot of time; in the case of viruses, we save an hour and a half a day compared to the previous solution”.

Installing Panda Security for Business with Exchange was extremely simple for the Kinopolis Group, while they needed several days to configure their previous solution. Panda Security offers real “plug & play”. The excellent console support, in the same language, is also highly appreciated by Messelis: “I value this support and give it an 80% rating”.

Panda Security detects all the spyware on the corporate network. Above all, the update frequency is another benefit for the Kinopolis Group. “We are also satisfied with the training”, says Messelis.

The Panda Security solutions effectively protect all the layers of Kinopolis’ network, from workstations to file and mail servers and the corporate firewall.
