

# Panda GateDefender eSeries HotSpot Social

Ideal for cafés, sports centers, clubs,  
pubs and restaurants

Panda  
GateDefender eSeries

The pace of modern life has changed the way we live: clubs and pubs, bars and restaurants are often the ideal place not just to meet for lunch, but also for business or social meetings or just to relax. With **Panda GateDefender HotSpot** your customers can read newspapers online, chat with friends or send emails while enjoying a coffee or a meal in the comfort of your establishment. Gain your customers' loyalty and stay ahead of your competitors to attract new business by offering free Internet access with no additional hardware or license costs.

## Benefits

### Streamline and monitor the use of your Internet connection

Distribute bandwidth equally among users and encourage a higher customer turnover and consumption.

- Increase the number of simultaneous users by restricting the amount of bandwidth allocated to each one.
- Set daily, weekly or monthly data transfer limits for frequent users
- Restrict Internet access to your company's working hours

### Personalize the service to your own brand image

- Your customers can see a customized login page including the services and products you offer.
- Monetize the service through banners and ads with offers.

### Security and strict control over your network resources

- Easily check time and bandwidth usage per customer or visitor.
- Prevent illegal downloads or use of P2P sites with Web page filtering and firewall.
- Include a page with service conditions and a disclaimer for misuse of the connection by customers.

### Easy-to-install, maintenance-free service

- Use the **Panda SmartConnect™** feature to provide automatic secure Internet connectivity to visitors. No human intervention or technical knowledge required.
- **Panda Perimetral Console** offers your partners the tools needed to ensure quality, uninterrupted service: incidents are resolved rapidly and remotely without going on-site
- Don't worry about previous account credentials as you can automatically configure their expiry.

### Reduced infrastructure costs

- No need to buy additional hardware or PCs. **Panda GateDefender** is a **UTM** device and is USB Wi-Fi, ADSL and 3G/4G compatible.
- No need for software licenses or additional resources.

## Panda GateDefender eSeries SmartConnect™

Allow new connections automatically with **Panda SmartConnect™**. Your customers and visitors can connect to the Internet in **three simple steps**:

1. Open their browser and fill out the form with contact information
2. Choose the connection type they prefer
3. Check their mobile device and use the user name and password sent by email or SMS to log in with their browser

Once you have registered your **Panda SmartLogin** account it will be able to recognize devices without having to reenter user credentials.
