

<b>Scripting applications</b>	
<b>Name</b>	<b>Executable file</b>
Autoit	autoit.exe
Powershell	powershell.exe
PSEXEC	psexec.exe
	psecsvc.exe
Windows Shell	cmd.exe
Wscript	wscript.exe
Cscript	cscript.exe
Python	python.exe
	pythonw.exe
Perl	perl.exe
Linux Shell	sh.exe
	bash.exe
	zsh.exe

<b>Remote tools applications</b>	
<b>Name</b>	<b>Executable file</b>
ammy admin	aa_v3.exe
GotomyPC	g2comm.exe
	g2fileh.exe
	g2host.exe
	g2mainh.exe
	g2printh.exe
	g2svc.exe
	g2tray.exe
Logmein	lmiignition.exe
Logmein	lmiguardsvc.exe
Logmein	logmein.exe
Microsoft RDP	termsrv.exe
Microsoft Remote Desktop	mstsc.exe
Radmin	radmin3.exe
Radmin	famitrfc.exe
PCAnywhere client	awrem32.exe
PCAnywhere server	awhost32.exe
ShowmyPC	smpcsetup.exe
ShowmyPC	showmypc.exe
TeamViewer desktop	teamviewer_desktop.exe

TeamViewer service	teamviewer.exe, teamviewer_service.exe, teamviewerhost.exe
Dameware	dwracs.exe
VNC	winvnc.exe, vncviewer.exe, winvncsc.exe
Splashtop	strwinchat.exe, clienttoobe.exe, clienttoobe.exe

Admin Tools	
Name	Executable file
at	at.exe
Task Scheduler	schtasks.exe
Net	net.exe
mshta	mshta.exe
vssadmin	vssadmin.exe
wmic	wmic.exe
net	net2.exe
route	route.exe
ftp	ftp.exe

Unwanted freeware	
Name	Executable file
Tor	tor.exe
Emule	emule.exe
	emule.dll
Frostwire	frostwire.exe
Portabletor	portabletor.exe
Lphan	lphan.exe
DreaMule	DreaMule.exe
	DreaMule_3.2.exe
eDonkey	edonkey.exe
eDonkey2000	eDonkey2000.exe
Ares	ares.exe
Torrent	torrent.exe
uTorrent	uTorrent.exe
BitTorrent	BitTorrent.exe
DreaMule	DreaMule.exe

DreaMule	DreaMule.exe
----------	--------------

System Tools	
Name	Description
append	Operate with programs and directories (append)
arp	Address Resolution Protocol (arp)
assoc	File name extension associations (assoc)
at	Schedule commands and programs (at)
atmadm	Monitor atM call Manager (atmadm)
attrib	Files, directories attributes (attrib)
auditpol	Manipulate audit policies (auditpol)
autochk	Check NTFS disks (autochk)
autoconv	Convert FAT, FAT32 to NTFS (autoconv)
autofmt	Format drive (autofmt)
bcdboot	Work with system partitions (bcdboot)
bcdedit	Boot Configuration Data (bcdedit)
bdehdcfg	BitLocker Drive Encryption (bdehdcfg)
bitsadmin	Create jobs in Windows (bitsadmin)
bootcfg	Boot.ini file settings (bootcfg)
break	break
cacls	Access control lists of files (cacls)
call	Call batch program (call)
cd	Current directory in command line (cd)
certreq	Work with certificates (certreq)
certutil	Work with certificates (certutil)
change	Change Remote Desktop Session Host server settings (change)
chcp	Change code page (chcp)
chdir	Current directory in command line (cd)

chglogon	Logons on an rd session host server (chglogon)
chgport	List or change COM port mappings (chgport)
chgusr	Install mode for Remote Desktop Session Host server (chgusr)
chkdsk	Check file system (chkdsk)
chkntfs	Disk checking on start (chkntfs)
choice	Work with batch programs (choice)
cipher	Command line permanent deletion (cipher)
clip	Work with command output (clip)
cls	Clear command prompt window (cls)
cmd	Command line (cmd)
cmdkey	Manage user names and passwords (cmdkey)
cmstp	Delete connection manager service profile (cmstp)
color	Customize command prompt window (color)
comp	Files content comparison (comp)
compact	File compress utility (compact)
convert	Convert FAT, FAT32 to NTFS (convert)
copy	Copy files (copy)
cprofile	Clean profile (cprofile)
cscript	Run script in a command-line (cscript)
date	Manage system date (date)
dcpofix	Operate with Group Policy Objects (dcpofix)
defrag	Operate with files (defrag)
del	Delete files (del)
dfsrmig	Operate with SYSvol (dfsrmig)
diantz	Package files into a cabinet file (diantz)
dir	List content of path (dir)
diskcomp	Compare disks content (diskcomp)
diskcopy	Copy files in disk (diskcopy)
diskperf	Manage performance counters (diskperf)

diskraid	RAID disks management
diskshadow	Expose shadow copy service (diskshadow)
dispdia	Operate with logs (dispdia)
dnscmd	Operate DNS servers (dnscmd)
doskey	Operate with command line (doskey)
driverquery	Display drivers installed (driverquery)
echo	Operate with messages (echo)
edit	Edit files (edit)
endlocal	Restore environment variables (endlocal)
erase	Delete files (erase)
eventcreate	Custom event creation (eventcreate)
eventquery	Operate with logs (eventquery)
eventtriggers	Operate with events (eventtriggers)
evntcmd	Operate with events (evntcmd)
exit	Exit command line program (exit)
expand	Expand compressed files (expand)
extract	Operate with cabinet files, extract file (extract)
fc	Operate with files, compare files (fc)
find	Operate with files, search for string (find)
findstr	Operate with files, search for patterns (findstr)
finger	Operate with users, get user information (finger)
flattemp	Operate with folders (flattemp)
fondue	Enable Windows optional features (fondue)
for	Run command in file (for)
forfiles	Operate with files, run command in file (forfiles)
format	Operate with disks, format disk (format)
freedisk	Operate with disks, check free space (freedisk)
fsutil	File allocation tasks (fsutil)
ftype	Operate with files, file types (ftype)

fveupdate	Upgrade Windows, metadata (fveupdate)
getmac	Get MAC address (getmac)
gettype	Operate with system environment variables (gettype)
goto	Operate with command line (goto)
gpfixup	Fix domain name (gpfixup)
gpresult	Operate with remote user-computer (gpresult)
gpupdate	Update Group Policy settings (gpupdate)
graftabl	Display extended character set (graftabl)
help	Help for system commands (help)
helpctr	Help and support center home page (helpctr)
hostname	Display hostname of computer (hostname)
icacls	Manage access control lists-DACLs (icacls)
if	Conditional in batch programs (if)
inuse	Replace files locked (inuse)
ipconfig	Display network configuration (ipconfig)
ipxroute	Display information of routing tables (ipxroute)
irftp	Send files over infrared (irftp)
jetpack	Compact WINS DHCP database (jetpack)
klist	Work with Kerberos tickets (klist)
ksetup	Work with Kerberos tickets (ksetup)
ktmutil	Kernel Transaction Manager utility (ktmutil)
ktpass	Configure server principal name (ktpass)
label	Manage name of disk (label)
lodctr	Manage counters and registry (lodctr)
logman	Manage event session and logs (logman)
logoff	Log off user (logoff)
lp	lp

lpq	Display print queue (lpq)
macfile	Manage files and directories in Mac (macfile)
makecab	Package files into a cabinet file (makecab)
manage-bde	Work with BitLocker (manage-bde)
mapadmin	Manage User Name Mapping (mapadmin)
md	Create directory (md)
mkdir	Create directory (mkdir)
mklink	Create link (mklink)
mmc	Start Microsoft Management Console (mmc)
mode	Display controllable attributes of console (mode)
more	Display screen output (more)
mount	Mount Network File System (NFS) (mount)
mountvol	Manage volume (mountvol)
move	Move files between directories (move)
mqbkup	Backs up MSMQ message files and registry settings (mqbkup)
mqsvc	Manage applications and queues (mqsvc)
mqtgsvc	Monitor queue of messages (mqtgsvc)
msdt	Work with command line and troubleshooting (msdt)
msg	Send message to user (msg)
msiexec	Install file (msiexec)
msinfo32	Open the System Information tool (msinfo32)
mstsc	Connect to Remote Desktop (mstsc)
nbtstat	Display NETBIOS statistics (nbtstat)
net	net
netcfg	Install WinPE (netcfg)
netsh	Manage network configuration (netsh)
netstat	Display active TCP connections and details (netstat)

nfsadmin	Manage Server for NFS (nfsadmin)
nfsshare	Control NFS shares (nfsshare)
nfsstat	Display NFS statistics (nfsstat)
nlbmgr	Configure Network Load Balancing (nlbmgr)
nslookup	Diagnose DNS (nslookup)
ntbackup	Backup, restore computer (ntbackup)
ntcmdprompt	Run cmd.exe (ntcmdprompt)
ntfrsutl	Work with NT File Replication Service (ntfrsutl)
openfiles	Work with opened files (openfiles)
pagefileconfig	Work with Virtual Memory settings (pagefileconfig)
path	Display current command path (path)
pathping	Network latency test (pathping)
pause	Suspend batch execution (pause)
pbadmin	Administer phone books (pbadmin)
pentnt	Manage floating point in Pentium chip (pentnt)
perfmon	Start Windows Reliability and Performance Monitor (perfmon)
ping	Verify IP connectivity (ping)
pnpunattend	Audir computer (pnpunattend)
pnputil	Manage the driver store (pnputil)
popd	Work with directories (popd)
powershell	Windows PowerShell (powershell)
powershell_ise	Windows PowerShell Integrated Scripting Environment (powershell_ise)
print	Send file to print (print)
prncnfg	Configure printer (prncnfg)
prndrvr	Manage printer drivers (prndrvr)
prnjobs	Manage print jobs (prnjobs)
prnmngr	Manage printers (prnmngr)
prnport	Manage printer ports (prnport)
prnqctl	Work with printer (prnqctl)

prompt	Change Cmd.exe command prompt (prompt)
pubprn	Public printer (pubprn)
pushd	Operations with directories (pushd)
pushprinterconnections	Read Deployed Printer Connection settings (pushprinterconnections)
qappsrv	List remote desktop session host servers (qappsrv)
qprocess	Information of processes RDS (qprocess)
query	Information of processes RDS (query)
quser	Information of user sessions RDS (quser)
qwinsta	Remote desktop information (qwinsta)
rcp	Copy files between computers (rcp)
rd	Delete directory (rd)
rdpsign	Sign a Remote Desktop Protocol (rdpsign)
recover	Recover information in disk (recover)
reg	Operate with registry (reg)
regini	Modify registry (regini)
regini.exe	Modify registry (regini)
regsvr32	Register .dll files (regsvr32)
regsvr32.exe	Register .dll files (regsvr32)
relog	Extract logs (relog)
relog.exe	Extract logs (relog)
rem	Comment batch files (rem)
rem.exe	Comment batch files (rem)
ren	Rename file, directory (rename)
ren.exe	Rename file, directory (rename)
rename	Rename file, directory (rename)
rename.exe	Rename file, directory (rename)
repair-bde	Extract encrypted data (repair-bde)
repair-bde.exe	Extract encrypted data (repair-bde)
replace	Replace file (replace)
replace.exe	Replace file (replace)

reset	Reset Remote desktop session (reset)
reset.exe	Reset Remote desktop session (reset)
rexec	Run command on remote computer (rexec)
rexec.exe	Run command on remote computer (rexec)
rsetup	rsetup
rsetup.exe	rsetup
rmdir	Delete directory (rmdir)
rmdir.exe	Delete directory (rmdir)
robocopy	Copy file data (robocopy)
robocopy.exe	Copy file data (robocopy)
route_ws2008	Manage local IP routing table (route_ws2008)
route_ws2008.exe	Manage local IP routing table (route_ws2008)
rpcinfo	List programs in remote computer (rpcinfo)
rpcinfo.exe	List programs in remote computer (rpcinfo)
rpcping	RPC connectivity (rpcping)
rpcping.exe	RPC connectivity (rpcping)
rsh	Run command on remote computer (rsh)
rsh.exe	Run command on remote computer (rsh)
rundll32	Load DLLs (rundll32)
rundll32.exe	Load DLLs (rundll32)
rwinsta	Delete remote desktop session (rwinsta)
rwinsta.exe	Delete remote desktop session (rwinsta)
schtasks	Schedule commands, programs (schtasks)
schtasks.exe	Schedule commands, programs (schtasks)
scwcmd	Security Configuration Wizard tool (scwcmd)
scwcmd.exe	Security Configuration Wizard tool (scwcmd)
secedit	Work with system security (secedit)
secedit.exe	Work with system security (secedit)
serverceipoptin	Participate in CEIP (serverceipoptin)

serverceipoptin.exe	Participate in CEIP (serverceipoptin)
servermanagercmd	Manage roles and features (servermanagercmd)
servermanagercmd.exe	Manage roles and features (servermanagercmd)
setlocal	Se local variables (setlocal)
setlocal.exe	Se local variables (setlocal)
setx	Manage environment variables (setx)
setx.exe	Manage environment variables (setx)
sfc	Work with protected system files (sfc)
sfc.exe	Work with protected system files (sfc)
shadow	Control remote session (shadow)
shadow.exe	Control remote session (shadow)
shift	Operate with batch files (shift)
shift.exe	Operate with batch files (shift)
showmount	Display mounted directories (showmount)
showmount.exe	Display mounted directories (showmount)
shutdown	Shutdown computer (shutdown)
shutdown.exe	Shutdown computer (shutdown)
sort	Work with data (sort)
sort.exe	Work with data (sort)
start	Start command prompt window (start)
start.exe	Start command prompt window (start)
subst	Associate path with drive letter (subst)
subst.exe	Associate path with drive letter (subst)
sxstrace	Diagnose side-by-side problems (sxstrace)
sxstrace.exe	Diagnose side-by-side problems (sxstrace)
sysocmgr	Install optional components (sysocmgr)
sysocmgr.exe	Install optional components (sysocmgr)
systeminfo	Display system information (systeminfo)

systeminfo.exe	Display system information (systeminfo)
takeown	Take ownership of file (takeown)
takeown.exe	Take ownership of file (takeown)
tapicfg	Configure TAPI (tapicfg)
tapicfg.exe	Configure TAPI (tapicfg)
taskkill	End task (taskkill)
taskkill.exe	End task (taskkill)
tasklist	Display running processes (tasklist)
tasklist.exe	Display running processes (tasklist)
tcmsetup	Sets up, disable TAPI client (tcmsetup)
tcmsetup.exe	Sets up, disable TAPI client (tcmsetup)
telnet	Telnet service (telnet)
telnet.exe	Telnet service (telnet)
tftp	Transfer files (tftp)
tftp.exe	Transfer files (tftp)
time	Display, set system time (time)
time.exe	Display, set system time (time)
timeout	Pause command processor (timeout)
timeout.exe	Pause command processor (timeout)
title	Set title for command window (title)
title.exe	Set title for command window (title)
tIntadm	Administer computer (tIntadm)
tIntadm.exe	Administer computer (tIntadm)
tpmvscmgr	Create, delete TPM virtual smart cards (tpmvscmgr)
tpmvscmgr.exe	Create, delete TPM virtual smart cards (tpmvscmgr)
tracert	Parse Event Trace Logs (tracert)
tracert.exe	Parse Event Trace Logs (tracert)
tracert	Path to destination (ICMP) (tracert)
tracert.exe	Path to destination (ICMP) (tracert)

tree	Display directory structure (tree)
tree.exe	Display directory structure (tree)
tscon	Remote desktop connection (tscon)
tscon.exe	Remote desktop connection (tscon)
tsdiscon	Disconnect remote desktop session (tsdiscon)
tsdiscon.exe	Disconnect remote desktop session (tsdiscon)
tsecimp	Import assignment information (tsecimp)
tsecimp.exe	Import assignment information (tsecimp)
tskill	End a process in remote desktop session (tskill)
tskill.exe	End a process in remote desktop session (tskill)
tsprof	Copy remote desktop configuration (tsprof)
tsprof.exe	Copy remote desktop configuration (tsprof)
type	Display content of file (type)
type.exe	Display content of file (type)
typeperf	Write performance data (typeperf)
typeperf.exe	Write performance data (typeperf)
tzutil	Windows time Zone Utility (tzutil)
tzutil.exe	Windows time Zone Utility (tzutil)
unlodctr	Remove information in registry (unlodctr)
unlodctr.exe	Remove information in registry (unlodctr)
ver	Operating system version number (ver)
ver.exe	Operating system version number (ver)
verifier	Driver verifier manager (verifier)
verifier.exe	Driver verifier manager (verifier)
verify	Verify files written in disk (verify)
verify.exe	Verify files written in disk (verify)
vol	Display disk information (vol)

vol.exe	Display disk information (vol)
waitfor	Wait for signal on system (waitfor)
waitfor.exe	Wait for signal on system (waitfor)
wbadmin	Backup and restore utility (wbadmin)
wbadmin.exe	Backup and restore utility (wbadmin)
wdsutil	Manage Windows Deployment Services server (wdsutil)
wdsutil.exe	Manage Windows Deployment Services server (wdsutil)
wecutil	Manage suscriptions to events (wecutil)
wecutil.exe	Manage suscriptions to events (wecutil)
wevtutil	Information of logs (wevtutil)
wevtutil.exe	Information of logs (wevtutil)
where	Locate files (where)
where.exe	Locate files (where)
whoami	User information (whoami)
whoami.exe	User information (whoami)
winnt	Installation or upgrade in Windows (winnt)
winnt.exe	Installation or upgrade in Windows (winnt)
winnt32	Installation or upgrade in Windows (winnt32)
winnt32.exe	Installation or upgrade in Windows (winnt32)
winpop	POP3 service administration tool (winpop)
winpop.exe	POP3 service administration tool (winpop)
winrs	Windows remote Management (wlbs)
winrs.exe	Windows remote Management (wlbs)
wlbs	Windows NT Load Balancing Service (wlbs)
wlbs.exe	Windows NT Load Balancing Service (wlbs)
wmic	WMI information (wmic)
wmic.exe	WMI information (wmic)
wscript	Windows Script Host (wscript)
wscript.exe	Windows Script Host (wscript)

xcopy	Copy files and directories (xcopy)
xcopy.exe	Copy files and directories (xcopy)

<b>Sysinternal Tools</b>	
<b>Name</b>	<b>Executable file</b>
psexec	psexec.exe
accessenum	accessenum.exe
adexplorer	adexplorer.exe
adinsight	adinsight.exe
adrestore	adrestore.exe
autologon	autologon.exe
autoruns	autoruns.exe
bginfo	bginfo.exe
cacheset	cacheset.exe
clockres	clockres.exe
clockres	contig.exe
coreinfo	coreinfo.exe
ctrl2cap	ctrl2cap.exe
debugview	debugview.exe
disk2vhd	disk2vhd.exe
diskext	diskext.exe
diskmon	diskmon.exe
diskview	diskview.exe
efsdump	efsdump.exe
findlinks	findlinks.exe
handle	handle.exe
hex2dec	hex2dec.exe
junction	junction.exe
ldmdump	ldmdump.exe
listdlls	listdlls.exe
livekd	livekd.exe
loadorder	loadorder.exe
logonsessions	logonsessions.exe
portmon	portmon.exe
procdump	procdump.exe
process explorer	procexp.exe
pipelist	pipelist.exe
process monitor	procmon.exe

psfile	psfile.exe
psgetsid	psgetsid.exe
psinfo	psinfo.exe
psping	psping.exe
pskill	pskill.exe
psloggedon	psloggedon.exe
psloglist	psloglist.exe
pspasswd	pspasswd.exe
psservice	psservice.exe
psshutdown	psshutdown.exe
rammap	rammap.exe
pssuspend	pssuspend.exe
regdelnull	regdelnull.exe
regjump	regjump.exe
sdelete	sdelete.exe
shareenum	shareenum.exe
pslist	pslist.exe,pslist
shellrunas	shellrunas.exe
sigcheck	sigcheck.exe
streams	streams.exe
strings	strings.exe
sysmon	sysmon.exe
tcpview	tcpview.exe
whois	whois.exe
winobj	winobj.exe
zoomit	zoomit.exe
registry usage	ru.exe
desktops	desktops.exe
