Panda GateDefender eSeries
HotSpot Business

Ideal for conference centers, offices, corporate HQs and airport VIP lounges

Panda
GateDefender**eSeries**

All offices and conference centers now require communication tools and access to information. To this end, it is essential nowadays for these environments to offer a quality Internet connection. **Panda GateDefender eSeries HotSpot** lets you share your company's Internet access and offer your customers and visitors controlled, quality Internet access, while ensuring the security and confidentiality of their data.

Benefits

Controlled, free Internet access
Offer free, yet controlled, Internet access exclusively to your customers and visitors.
- Assign upload/download bandwidth to each user.
- Set daily, weekly or monthly data transfer limits for frequent users.
- Determine the maximum connection time for each visitor or customer.
- Restrict Internet access to your company's working hours.

Personalize the service to your own corporate image
- Your customers and visitors can see a login page customized with your company's image.
- Offer quick access to services and tools delivered by your business.
- Monetize the service through banners and ads for conferences and events.

Easy to manage service with zero maintenance
- Use the **Panda SmartConnect**™ feature to provide automatic secure Internet connectivity to visitors. No human intervention or technical knowledge required.
- **Panda Perimetral Console** offers your partners the tools needed to ensure quality, uninterrupted service: incidents are resolved rapidly and remotely without going on-site.
- Don't worry about previous account credentials as you can automatically configure their expiry.

Re-use existing infrastructure
- No need for software licenses or additional computers.
- Reuse your Internet infrastructure securely and without data leakage or problems by isolating your company's internal network resources.
- With **Panda HotSpot Satellite** your customers and visitors can use the service in your company's different locations without having to reset their devices.

Internet connection and strict control over your network resources
- Offer a secure Internet connection service with all the benefits of using a **UTM** appliance: Web filtering, antivirus and anti-malware scanning, anti-spam filtering and protection against fraudulent emails and websites.

Panda GateDefender eSeries **HotSpot Business**

Ideal for conference centers, offices, corporate HQs and airport VIP lounges

## Panda GateDefender eSeries SmartConnect™

Allow new connections automatically with **Panda SmartConnect**™. Your customers and visitors can connect to the Internet in **three simple steps**:

1. Open their browser and fill out the form with contact information.
2. Choose the connection type they prefer.
3. Check their mobile device and use the user name and password sent by email or SMS to log in with their browser.

Once you have registered your **Panda SmartLogin** account it will be able to recognize devices without having to reenter user credentials.

Panda GateDefender eSeries HotSpot Satellites™

For companies and businesses with offices in several locations, **Panda GateDefender eSeries HotSpot Satellites** lets you centralize the setting up and validation of user accounts. This way, users can enjoy the service across several locations without having to change settings or sign up again when arriving at a different office.
