

Panda GateDefender eSeries HotSpot Hospitality

Ideal for hotels, youth hostels,
halls of residence and campsites

Panda
GateDefender eSeries

Nowadays, having an Internet connection in hotels is more a necessity than a choice. No matter whether your customers are tourists or business travelers, it is essential to offer the necessary infrastructure for controlled and secure Internet access.

Business people traveling to close a deal or visit customers expect to find hotel rooms that offer a virtual office with secure **access to their corporate network, virus-free email and even videoconference facilities to contact customers and partners.**

Tourists want to be able to plan their activities: **get local maps, find out about places of interest or even post photos** and comments on their blogs or social media.

Boost your revenue and extend your offer of services with **Panda GateDefender eSeries HotSpot** by offering your customers easy-to-use quality Internet connection with no need for them to reconfigure their devices.

Benefits

Billing tailored to your needs

- Pre-paid billing including support for PayPal
- Post-paid billing with usage integrated in the software used in your organization (PMS).
- Free, configurable connection support, exclusive to your visitors and customers.
